

 woanware

csvvaluehelper

About

woanware is the name for a set of tools and applications I have written. The majority of the tools/applications are related to networking, network security, application security or digital forensic tasks.

History

v1.0.2

- Ensured that the field used by the CSV reader library is decremented by 1 as it uses a 0 based array

v1.0.1

- Removed LumenWorks.Framework.IO library and replaced with CsvHelper due to parsing issues

v1.00

- Initial public release
